

INNO TEXTILES

DACRON – LOFTED MATERIAL

September 2012

VOL 1 ISSUE 1

Inno Textiles are proud to announce the commissioning of a new production line designed to expand our product offering to you, our customer. This opens up new avenues of innovation which we are eager to explore together, building a stronger & more committed business.

TRIALS AND SAMPLES

One of our specialties is the ability to manufacture products to client specifications.

We collect samples from clients and produce the required item to specification.

If you have a product that you would like us to price please call or e-mail us and we'll have it collected from you.

PRODUCTS AND SPECS

The line is designed to produce a large range of both needled & thermo bonded materials, with varying density's, from thin (<2mm) high density products, to thick (up to 100mm) lofted materials.

Weight ranges from 60g/m² up to 1500g/m² are achievable.

Widths range up to 2.2m.

Our targeted industries for the new line include:

- Filtration
- Furniture manufacturers
- Bedding manufacturers
- Automotive

Categories include:

- Sound and thermal insulation
- Padding
